Licensing

There are two available licensing methods for eCADSTAR. Depending on the license type, different steps may need to be taken.

- 1. **Network License** :- If you are using network licensing, you need to follow the instructions in the Network Licensing Guide. This is available from the eCADSTAR Product Download page alongside the software install.
- 2. Node Locked License :- If using a software Key (dongle) you will need to install the Sentinel driver. The driver installation file is available from the eCADSTAR Product Download page alongside the software install.

Quick Start Guide for Installation on PC

- 1. Download and run the eCADSTAR Software installation file and follow the prompts in the installation wizard. This can be launched from the Zuken Global Support page (eCADSTAR Downloads). The download link is shown in the Licensing images (no.3).
- 2. You may be asked for permission to install eCADSTAR onto your computer
- 3. Choose either **Node Locked only** or **Network Licensed and/or Node Locked**. For **Network Licensed** you should enter the License Server Host Name and Host Port Number.

< Back Next >

Cancel

Port: 1700

InstallShield

 Network License :- Point to the location of the license server by entering the Host Name and Host Port Number within the Product Settings dialog, accessible via the File >- Configuration >- Product Settings... menu in any of the eCADSTAR applications.

Canvas Information	License settings*	
Graphics View Operation Advanced Analysis 3D Updates and User Experience Library Web Lookup Environment Mouse Settings License Settings	Authorization selection PCB High Speed Schematic High Speed Advanced 3D SPICE Controller License type (Administrator) Node locked only Network licensed and/or node locked Network license host (Administrator) Host name: cadstar Host port: 1700	Pequestable features PCB Schematic Design Cashematic Megh Speed PCB Wath PCB Wath

2. Node Locked License :- After installation is complete, place the license.dat file you have received from your reseller in the **bin** directory of your eCADSTAR installation. You may require administration rights to perform this operation.
